CORE COMPETENCIES

Project Planning	Budget & Cost Control
Vendor Management	Risk & Dependencies
Stakeholder Mgmt	Change Control
Cloud Governance	SAFe® / Agile Delivery
Technical Delivery	Executive Reporting

TOOLS

MS Project

Azure DevOps

AWS

Jira

Confluence

Miro

Power BI

CERTIFICATIONS

- ✓ CERTIFIED SCRUM MASTER (CSM)
- ✓ SAFE® 5 CERTIFIED
- ✓ SAFE® SCRUM MASTER
- ✓ PROJECT MANAGEMENT FOUNDATION

PROFESSIONAL PROFILE

I'm a **Technical Project Manager and Delivery Lead** with 12+ years delivering infrastructure, cloud, and platform programs across banking, healthcare, and high-tech. Most recently at ASML, I helped scale an Agile Release Train from 5 to 14 engineering teams, delivering the launch on time with an 80% completion rate against committed objectives. I own scope, budget, and schedule, managing programs up to ZAR 50m (≈ €2.5m) across vendors including Microsoft, AWS, and Oracle, and keep steering committees and senior sponsors informed through clear, structured reporting. My strength is disciplined, audit-ready execution in regulated, security-critical environments, while staying responsive to changing business needs.

WORK EXPERIENCE

Delivery Lead / Agile Coach

ASML • Veldhoven, Netherlands

03/2024 – 03/2026

- Program Delivery & Scaling:** Delivered the launch of an Agile Release Train on time and helped scale it from 5 to 14 engineering teams, sustaining an 80% completion rate against committed objectives from initiation onward.
- Delivery Leadership:** Directly led delivery for 2 highly technical squads (10 people each, incl. Product Owners), operating as delivery lead beyond classic Scrum Master scope, owning risks, dependencies, and stakeholder alignment for both teams.
- Planning & Execution at Scale:** Led PI Planning preparation and execution across the train, building and maintaining a master delivery plan that aligned cross-team dependencies with value-stream and business objectives.
- Risk & Dependency Management:** Introduced dependency-visualization practices that exposed cross-team blockers earlier and accelerated their resolution, measurably improving program predictability and reducing schedule risk.
- Stakeholder Alignment:** Coordinated business stakeholders across Security, Risk, and Compliance, and partnered with Release Train Engineers, Product Management, and domain leads on scope and execution strategy.
- Governance & Capability Building:** Standardized tooling, reporting, and workflow practices to improve transparency and audit readiness; mentored Scrum Masters and team leads on structured execution.

Scrum Master

Philips HealthSuite (via Amaris Consulting) • Eindhoven, Netherlands

06/2023 – 12/2023

- Facilitated SAFe ceremonies and led PI Planning at scale for distributed teams in a regulated healthcare environment, enabling realistic, committed delivery plans.
- Bridged engineering and business stakeholders, translating requirements into actionable items; surfaced cross-team risks early and tracked dependencies to resolution.
- Coached teams and leaders on Lean-Agile principles, fostering psychological safety and continuous improvement.

Agile Coach

TMC • Eindhoven, Netherlands

10/2022 – 04/2023

- Implemented and scaled Scrum and Lean-Agile practices, improving delivery effectiveness; coached leadership on adopting Agile delivery models.
- Led Agile transformation initiatives, new tools, frameworks, and delivery practices, partnering with stakeholders to align priorities and clarify requirements.
- Embedded governance through structured ceremonies, transparent reporting, and consistent communication channels.

Technical Project Manager & Scrum Master

Nedbank • Johannesburg, South Africa

07/2019 – 08/2022

- Client & Stakeholder Delivery Ownership:** Owned end-to-end delivery across DEV, ETE, QA, and Production for infrastructure and cloud programs, primary coordination point between senior sponsors, Information Security, and technical teams, translating requirements into scoped execution plans.
- Multi-Vendor & Cross-Border Coordination:** Managed simultaneous delivery across Microsoft, AWS, Dimension Data, BCX, and Oracle, aligning each vendor's workstream to a shared timeline and keeping deliverables across South Africa and NAR regions synchronized with internal milestones.
- Scope, Budget & Schedule Control:** Owned budgets ranging from ZAR 3m to ZAR 50m (≈ €150k–€2.5m) across concurrent infrastructure programs. Built and maintained detailed execution plans, milestone maps, and resource forecasts in MS Project; managed changes to scope, schedule, and cost through formal change control.
- Risk Management & Governance:** Identified and resolved delivery risks ahead of impact, from environment readiness gaps to integration blockers. Ensured every cloud build met IAM, network security, encryption, and compliance requirements before promotion, with full audit traceability.
- Executive & Stakeholder Reporting:** Produced structured status reporting for senior stakeholders covering progress, risk exposure, and budget position, enabling informed decisions and timely escalation.
- Technical Infrastructure Delivery:** Directed VPC design, network segmentation, ACLs, firewall rules, and identity policies across large-scale Azure and AWS environments, aligned with security governance standards.

TECHNICAL SKILLS

- ✓ STAKEHOLDER MANAGEMENT
- ✓ TEAM MANAGEMENT
- ✓ DATA CENTER OPERATIONS
- ✓ RISK MANAGEMENT
- ✓ JIRA
- ✓ CONFLUENCE
- ✓ SCRUM & AGILE METHODOLOGIES
- ✓ SCRUM MASTER
- ✓ PROJECT MANAGEMENT
- ✓ PROJECT TRACKING & REPORTING
- ✓ SCOPE DOCUMENTATION
- ✓ GOVERNANCE & REPORTING
- ✓ AZURE & AWS INFRASTRUCTURE
- ✓ NETWORK & SERVER ENVIRONMENTS

NOTABLE PROJECTS

Azure & AWS Data Centre Build | Multi-Vendor Infrastructure Delivery & Governance: Nedbank

Led a large-scale Azure and AWS cloud migration and infrastructure build program across DEV, ETE, QA, and Production environments, managing the full project lifecycle from scope definition through delivery. Coordinated Microsoft, AWS, and internal engineering teams as concurrent delivery partners, aligning each vendor's workstream through phased milestones, dependency tracking, and structured execution plans. Owned budget and schedule adherence throughout, escalating and resolving cross-team blockers before they impacted timeline. Ensured all environments met security controls, IAM requirements, network access policies, and compliance standards in partnership with Information Security. Maintained audit-ready governance documentation (decision logs, risk registers, change records, technical signoffs). Delivered the 12-month program on time and within budget with a delivery team that scaled from 10 to 20 people, cutting on-premises data center operating costs by 50%.

AIX Rightsizing & Cost Optimization | Multi-Vendor Program Management: Nedbank
Managed the end-of-life upgrade and optimization of 300+ AIX server environments across DEV, ETE, QA, and Production as a structured, phased delivery program. Application owners reported measurably faster application response times post-upgrade. Coordinated BCX, Dimension Data, and internal infrastructure teams as parallel delivery workstreams, each requiring independent scheduling, risk tracking, and milestone alignment against a shared program timeline. Owned change governance for the program, every configuration change underwent security impact assessment, compliance review, and formal change management approval before execution. Tracked cross-team dependencies and surfaced risks early, maintaining delivery momentum through clear milestone reporting and direct stakeholder communication.

Azure Data Archiving | Large-Scale Migration Program, Budget & Vendor Management: Nedbank

Coordinated the secure migration of 400TB+ of on-premises data to Azure as an end-to-end delivery program spanning Microsoft, BCX, Dimension Data, and internal engineering teams, managing scope, schedule, and multi-vendor execution from initiation through go-live. Partnered directly with Information Security and compliance stakeholders to ensure data handling, encryption, transfer protocols, and storage configurations met governance standards before migration proceeded. Identified a cost-saving delivery approach using an Azure Databox-based solution, delivering a ZAR 3m (≈ €150k) cost saving against the original plan. Maintained clear progress tracking, risk visibility, and audit-ready documentation throughout.

Agile Release Train Launch | Program Structuring, Stakeholder Alignment & Governance Enablement: ASML

Launched a multi-team delivery program from the ground up and helped scale it from 5 to 14 teams, structuring and onboarding cross-functional teams, establishing governance practices, and defining roles, delivery processes, and alignment mechanisms. Partnered directly with Release Train Engineers, Product Management, and domain leads as the coordination point between business priorities and technical execution capacity. The train launched on time and sustained an 80% completion rate against committed objectives.

CYBERSECURITY & COMPLIANCE EXPERIENCE

- Validated IAM, encryption, network security, and data-handling controls before promotion of any environment or workload, in partnership with Information Security across banking, healthcare, and high-tech programs.
- Maintained full audit traceability (decision logs, risk registers, change records) throughout the delivery lifecycle, not just at completion.
- Coordinated security analysts and architects, translating compliance requirements into clear expectations for technical delivery teams.

EDUCATION & PROFESSIONAL QUALIFICATIONS

- **Certified Scrum Master** | Scrum Alliance (2019)
- **Project Management Foundation** | University of Cape Town, South Africa (2018)
- **Leading SAFe 5.1** | SAFe (2021)
- **SAFe® Scrum Master** | SAFe (2021)

EARLIER CAREER

Project Estimation Consultant & Administrator | 07/2016 - 12/2018 | AllAboutXpert • South Africa

Project Estimation Consultant & Administrator | 07/2016 - 02/2017 | ABSA Bank via AllAboutXpert • South Africa

Project Manager | 08/2013 - 06/2016 | Uthongathi Construction • Durban, South Africa

Casino Croupier | 09/2007 - 07/2013 | Sibaya Casino • Durban, South Africa
