ENGLISH (FLUENT) · DUTCH (A2, IN
PROGRESS) · AFRIKAANS (BASIC)

CORE COMPETENCIES

Agile Coaching	SAFe® / Scaled Agile
Scrum Master	Cloud Governance
Risk Management	Stakeholder Mgmt
Jira / Confluence	Technical Delivery
Data Center Ops	Cybersecurity

TOOLS

Azure DevOps

MS Project

AWS

Jira

Confluence

Miro

Power BI

CERTIFICATIONS

- ✓ CERTIFIED SCRUM MASTER (CSM)
- ✓ SAFE® 5 CERTIFIED
- ✓ SAFE® SCRUM MASTER
- ✓ PROJECT MANAGEMENT FOUNDATION

PROFESSIONAL PROFILE

I'm a **Scrum Master and Agile Coach** who thrives in complex engineering environments where security, governance, and delivery discipline matter. Most recently at ASML, I helped scale an Agile Release Train from 5 to 14 teams, coaching 2 highly technical squads directly and sustaining an 80% completion rate against committed objectives. Across banking, healthcare, and high-tech, I've facilitated Agile delivery for cloud, infrastructure, and platform teams, working closely with architects, platform engineers, and InfoSec. I'm at my best removing impediments, coaching Lean-Agile practices, and aligning stakeholders across Security, Risk, and Compliance, keeping execution structured, transparent, and audit-ready while teams stay moving and focused on what matters.

WORK EXPERIENCE

Agile Coach / Scrum Master

ASML • Veldhoven, Netherlands

03/2024 – 03/2026

- Coordinated delivery across an Agile Release Train that scaled from 5 to 14 engineering teams, sustaining an 80% completion rate against committed objectives from initiation onward.
- Served as Scrum Master and delivery lead for 2 highly technical squads (10 people each, incl. Product Owners), owning risks, dependencies, and stakeholder alignment for both teams.
- Led PI Planning preparation and execution, managing cross-team dependencies to align value-stream priorities.
- Introduced dependency-visualization that exposed cross-team blockers earlier and accelerated their resolution, improving program predictability and reducing schedule risk.
- Aligned business stakeholders across Security, Risk, and Compliance; standardized tooling, reporting, and workflow practices for transparency and audit readiness.
- Proactively managed risks and impediments, resolving integration issues and environment readiness gaps before they impacted timelines.
- Mentored Scrum Masters and team leaders on scaling practices, governance, and structured execution.

Scrum Master

Philips HealthSuite (via Amaris Consulting) • Eindhoven, Netherlands

06/2023 – 12/2023

- Facilitated SAFe ceremonies and led PI Planning at scale for distributed teams in a regulated healthcare environment, enabling realistic, committed delivery plans.
- Bridged engineering and business stakeholders, translating requirements into actionable items; surfaced cross-team risks early and tracked dependencies to resolution.
- Coached teams and leaders on Lean-Agile principles, fostering psychological safety and continuous improvement.

Agile Coach

TMC • Eindhoven, Netherlands

10/2022 – 04/2023

- Implemented and scaled Scrum and Lean-Agile practices, improving delivery effectiveness; coached leadership on adopting Agile delivery models.
- Led Agile transformation initiatives (new tools, frameworks, and delivery practices), partnering with stakeholders to align priorities and clarify requirements.
- Embedded governance through structured ceremonies, transparent reporting, and consistent communication channels.

Technical Project Manager & Scrum Master

Nedbank • Johannesburg, South Africa

07/2019 – 08/2022

- Technical Delivery & Security Governance:** Led end-to-end delivery across DEV, ETE, QA, and Production. Ensured cloud builds met IAM, network security, encryption, and compliance controls. Managed VPC design, segmentation, ACLs, firewall rules, identity policies, and workload isolation.
- Execution Planning & Reporting:** Built detailed execution plans, milestone maps, and resource forecasts in MS Project for programs ranging from ZAR 3m to ZAR 50m (≈ €150k-€2.5m). Produced clear status reporting for senior stakeholders.
- Vendor Coordination:** Coordinated delivery across Microsoft, AWS, Dimension Data, BCX, and Oracle. Partnered with Infrastructure & Operations, Information Security, and senior sponsors.
- Scrum Master (Network Ops):** Served as Scrum Master for network infrastructure squad, maintaining Azure, AWS, O365, and SD-WAN across South Africa and NAR regions.

TECHNICAL SKILLS

- ✓ STAKEHOLDER MANAGEMENT
- ✓ TEAM MANAGEMENT
- ✓ DATA CENTER OPERATIONS
- ✓ RISK MANAGEMENT
- ✓ JIRA
- ✓ CONFLUENCE
- ✓ SCRUM & AGILE METHODOLOGIES
- ✓ SCRUM MASTER
- ✓ PROJECT MANAGEMENT
- ✓ PROJECT TRACKING & REPORTING
- ✓ SCOPE DOCUMENTATION
- ✓ GOVERNANCE & REPORTING
- ✓ AZURE & AWS INFRASTRUCTURE
- ✓ NETWORK & SERVER ENVIRONMENTS

NOTABLE PROJECTS

Azure & AWS Data Centre Build | Security, Governance & Cloud Infrastructure Delivery: Nedbank

Led a large-scale Azure and AWS cloud migration and infrastructure builds across DEV, ETE, QA, and Production environments. Coordinated Microsoft, AWS, and internal engineering teams through phased milestones, dependency tracking, and structured execution plans. Ensured all cloud environments met security controls, IAM requirements, network access policies, and compliance standards in partnership with Information Security. Managed cloud networking configurations including ACLs, environment isolation, and segmentation of workloads. Maintained audit-ready governance documentation (decision logs, risk registers, change records, technical signoffs). Delivered the 12-month program on time and within budget with a delivery team that scaled from 10 to 20 people, cutting on-premises data center operating costs by 50%.

AIX Rightsizing & Cost Optimization | Risk, Compliance & Controlled Execution: Nedbank

Managed the end-of-life upgrade and optimization of 300+ AIX server environments across DEV, ETE, QA, and Production. Application owners reported measurably faster application response times post-upgrade. Coordinated BCX, Dimension Data, and internal infrastructure teams through a structured, phased execution plan. Ensured all configuration changes underwent security impact assessments, compliance reviews, and formal change management approval. Tracked cross-team dependencies, surfaced risks early, and maintained delivery momentum through clear milestone tracking and stakeholder communication. Improved operational efficiency while maintaining full alignment with security, governance, and audit requirements.

Azure Data Archiving | Secure Data Handling, Encryption & Governance: Nedbank
Coordinated the secure migration of 400TB+ of on-premises data to Azure. Managed end-to-end execution across Microsoft, BCX, Dimension Data, and internal engineering teams. Partnered with Information Security and compliance teams to ensure data handling, encryption, transfer protocols, and storage configurations met cloud security and governance standards. Delivered a ZAR 3m (≈ €150k) cost saving by identifying and executing an Azure Databox-based solution. Maintained clear progress tracking, risk visibility, and audit-ready documentation throughout the program.

Agile Release Train Launch | Multi-Team Structuring & Governance Enablement: ASML
Launched a large-scale Agile Release Train from the ground up and helped scale it from 5 to 14 teams, structuring and onboarding cross-functional teams, establishing governance practices, and defining clear roles, delivery processes, and alignment mechanisms. Partnered with RTEs, Product Management, and domain leaders to clarify scope and execution strategy; the train launched on time and sustained an 80% completion rate against committed objectives.

CYBERSECURITY & COMPLIANCE EXPERIENCE

- Validated IAM, encryption, network security, and data-handling controls before promotion of any environment or workload, in partnership with Information Security across banking, healthcare, and high-tech programs.
- Maintained full audit traceability (decision logs, risk registers, change records) throughout the delivery lifecycle, not just at completion.
- Coordinated security analysts and architects, translating compliance requirements into clear expectations for technical delivery teams.

EDUCATION & PROFESSIONAL QUALIFICATIONS

- ▶ **Certified Scrum Master** | Scrum Alliance (2019)
- ▶ **Project Management Foundation** | University of Cape Town, South Africa (2018)
- ▶ **Leading SAFe 5.1** | SAFe (2021)
- ▶ **SAFe® Scrum Master** | SAFe (2021)

EARLIER CAREER

Project Estimation Consultant & Administrator | 07/2016 - 12/2018 | AllAboutXpert • South Africa

Project Estimation Consultant & Administrator | 07/2016 - 02/2017 | ABSA Bank via AllAboutXpert • South Africa

Project Manager | 08/2013 - 06/2016 | Uthongathi Construction • Durban, South Africa

Casino Croupier | 09/2007 - 07/2013 | Sibaya Casino • Durban, South Africa
